Wisconsin Community Action Program Association's
(Formerly the Women & Poverty Conference)

Poverty Matters!

November 17-18, 2010

Radisson Paper Valley Hotel
Appleton, WI

This conference is continuing to share ideas on poverty problems and solutions including best practices, development of new strategies, greater integration of services, and for a better understanding of how low-income people and community based organizations can work together to build economic opportunity.

In addition, the conference will offer several workshops or plenary sessions featuring informative keynote presentations on timely issues including the implementation federal health care reform in Wisconsin and an updated report on the 2009 State-wide effort "Building Bridges to Family Economic Success".

We have issued a Call for Proposals for workshops and presentations addressing poverty problems and solutions.

We especially seek proposals related to the following topics

- Creating economic opportunity and reducing poverty by building sustainable communities
- Civic engagement and advocacy
- Organizational and personal development

**The Call for Workshop Proposals form is available
at
www.wiscap.org**
